My Creative Process

01

Discover

Understanding the brief is paramount for me. It sets the stage, outlining client goals, user needs, constraints, and brand guidelines.

02

Define

Gathering more information is an essential component of my design process. It helps me understand the target audience, market trends, and potential competitors.

03

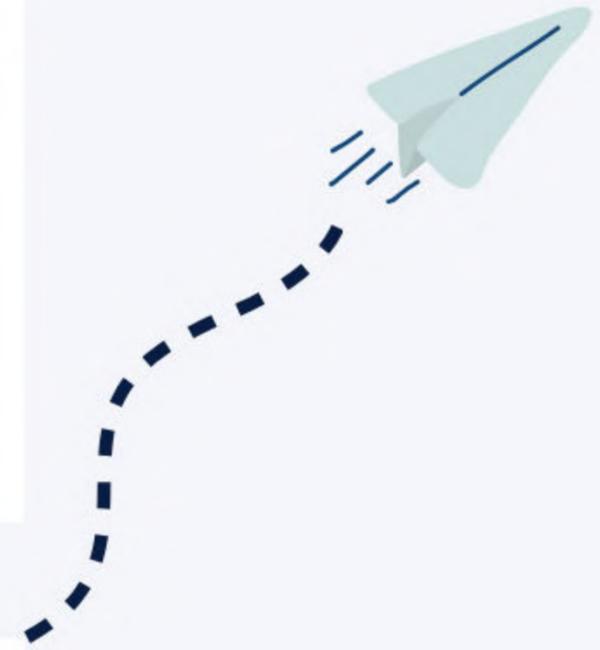

Iterate

I create initial concepts, iterate based on feedback, and refine the product. This process ensures a user-friendly and successful design.

04

Testing & Hand-off

I provide detailed design specifications to developers, ensuring accurate implementation. Thorough testing guarantees a seamless user experience.

Creative Agency Website

Web Design

Product Design

[Live Project →](#)

This project overhauled the agency's digital presence, adopting a creative marketing-led design to clearly communicate the mission of "Enabling Innovation" to B2B clients.

As the web designer, I was responsible for developing the site using Framer. I translated the new strategic direction into a responsive, high-performance website, ensuring a seamless and premium user experience across all devices.

BRIAPI Dev Studio

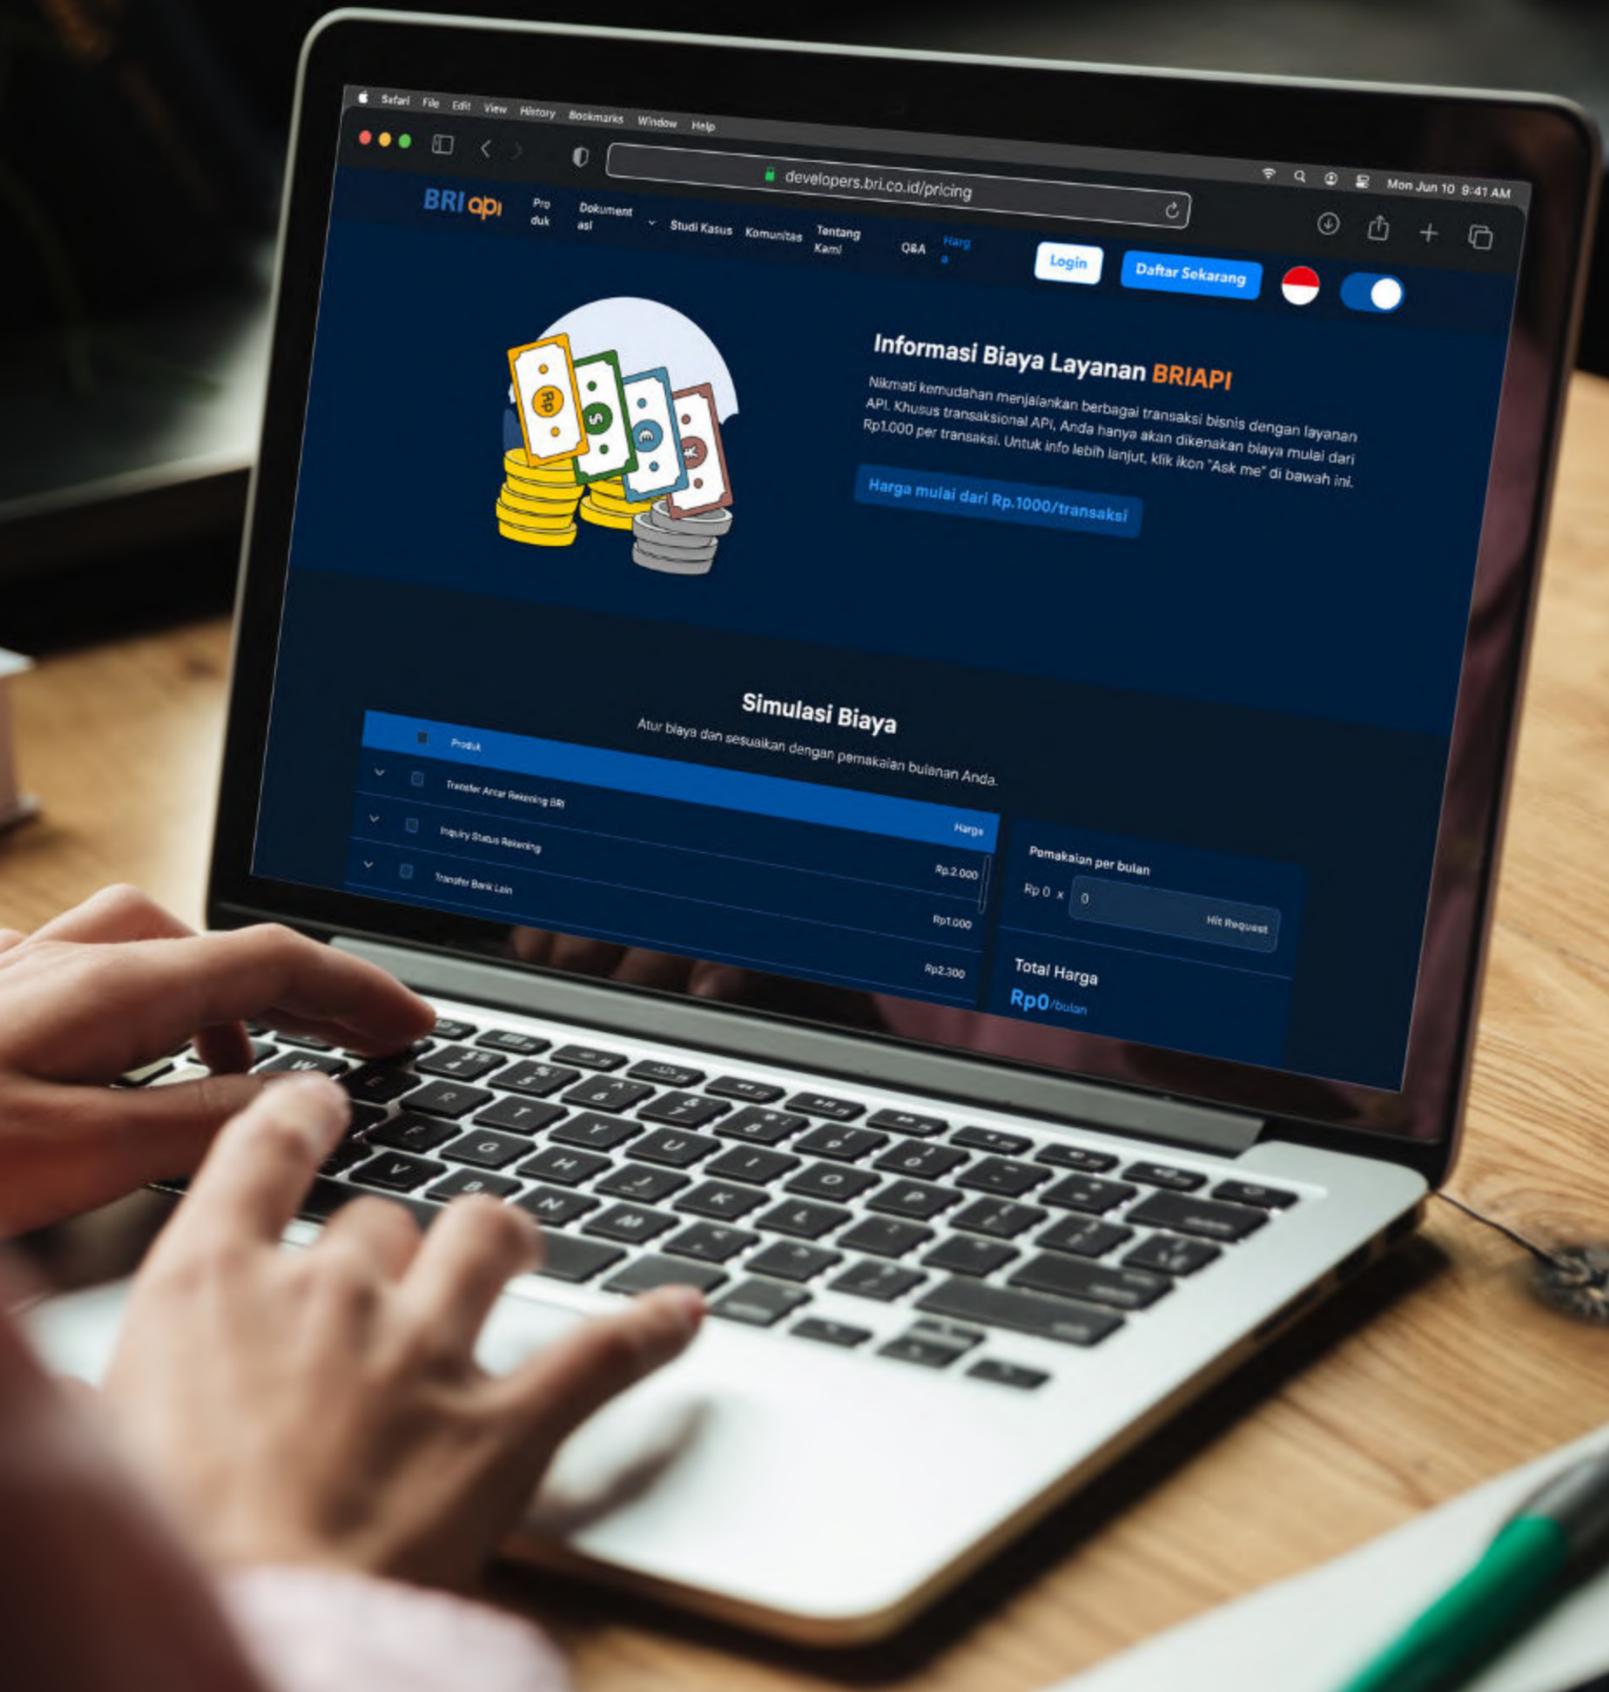

Website

Product Design

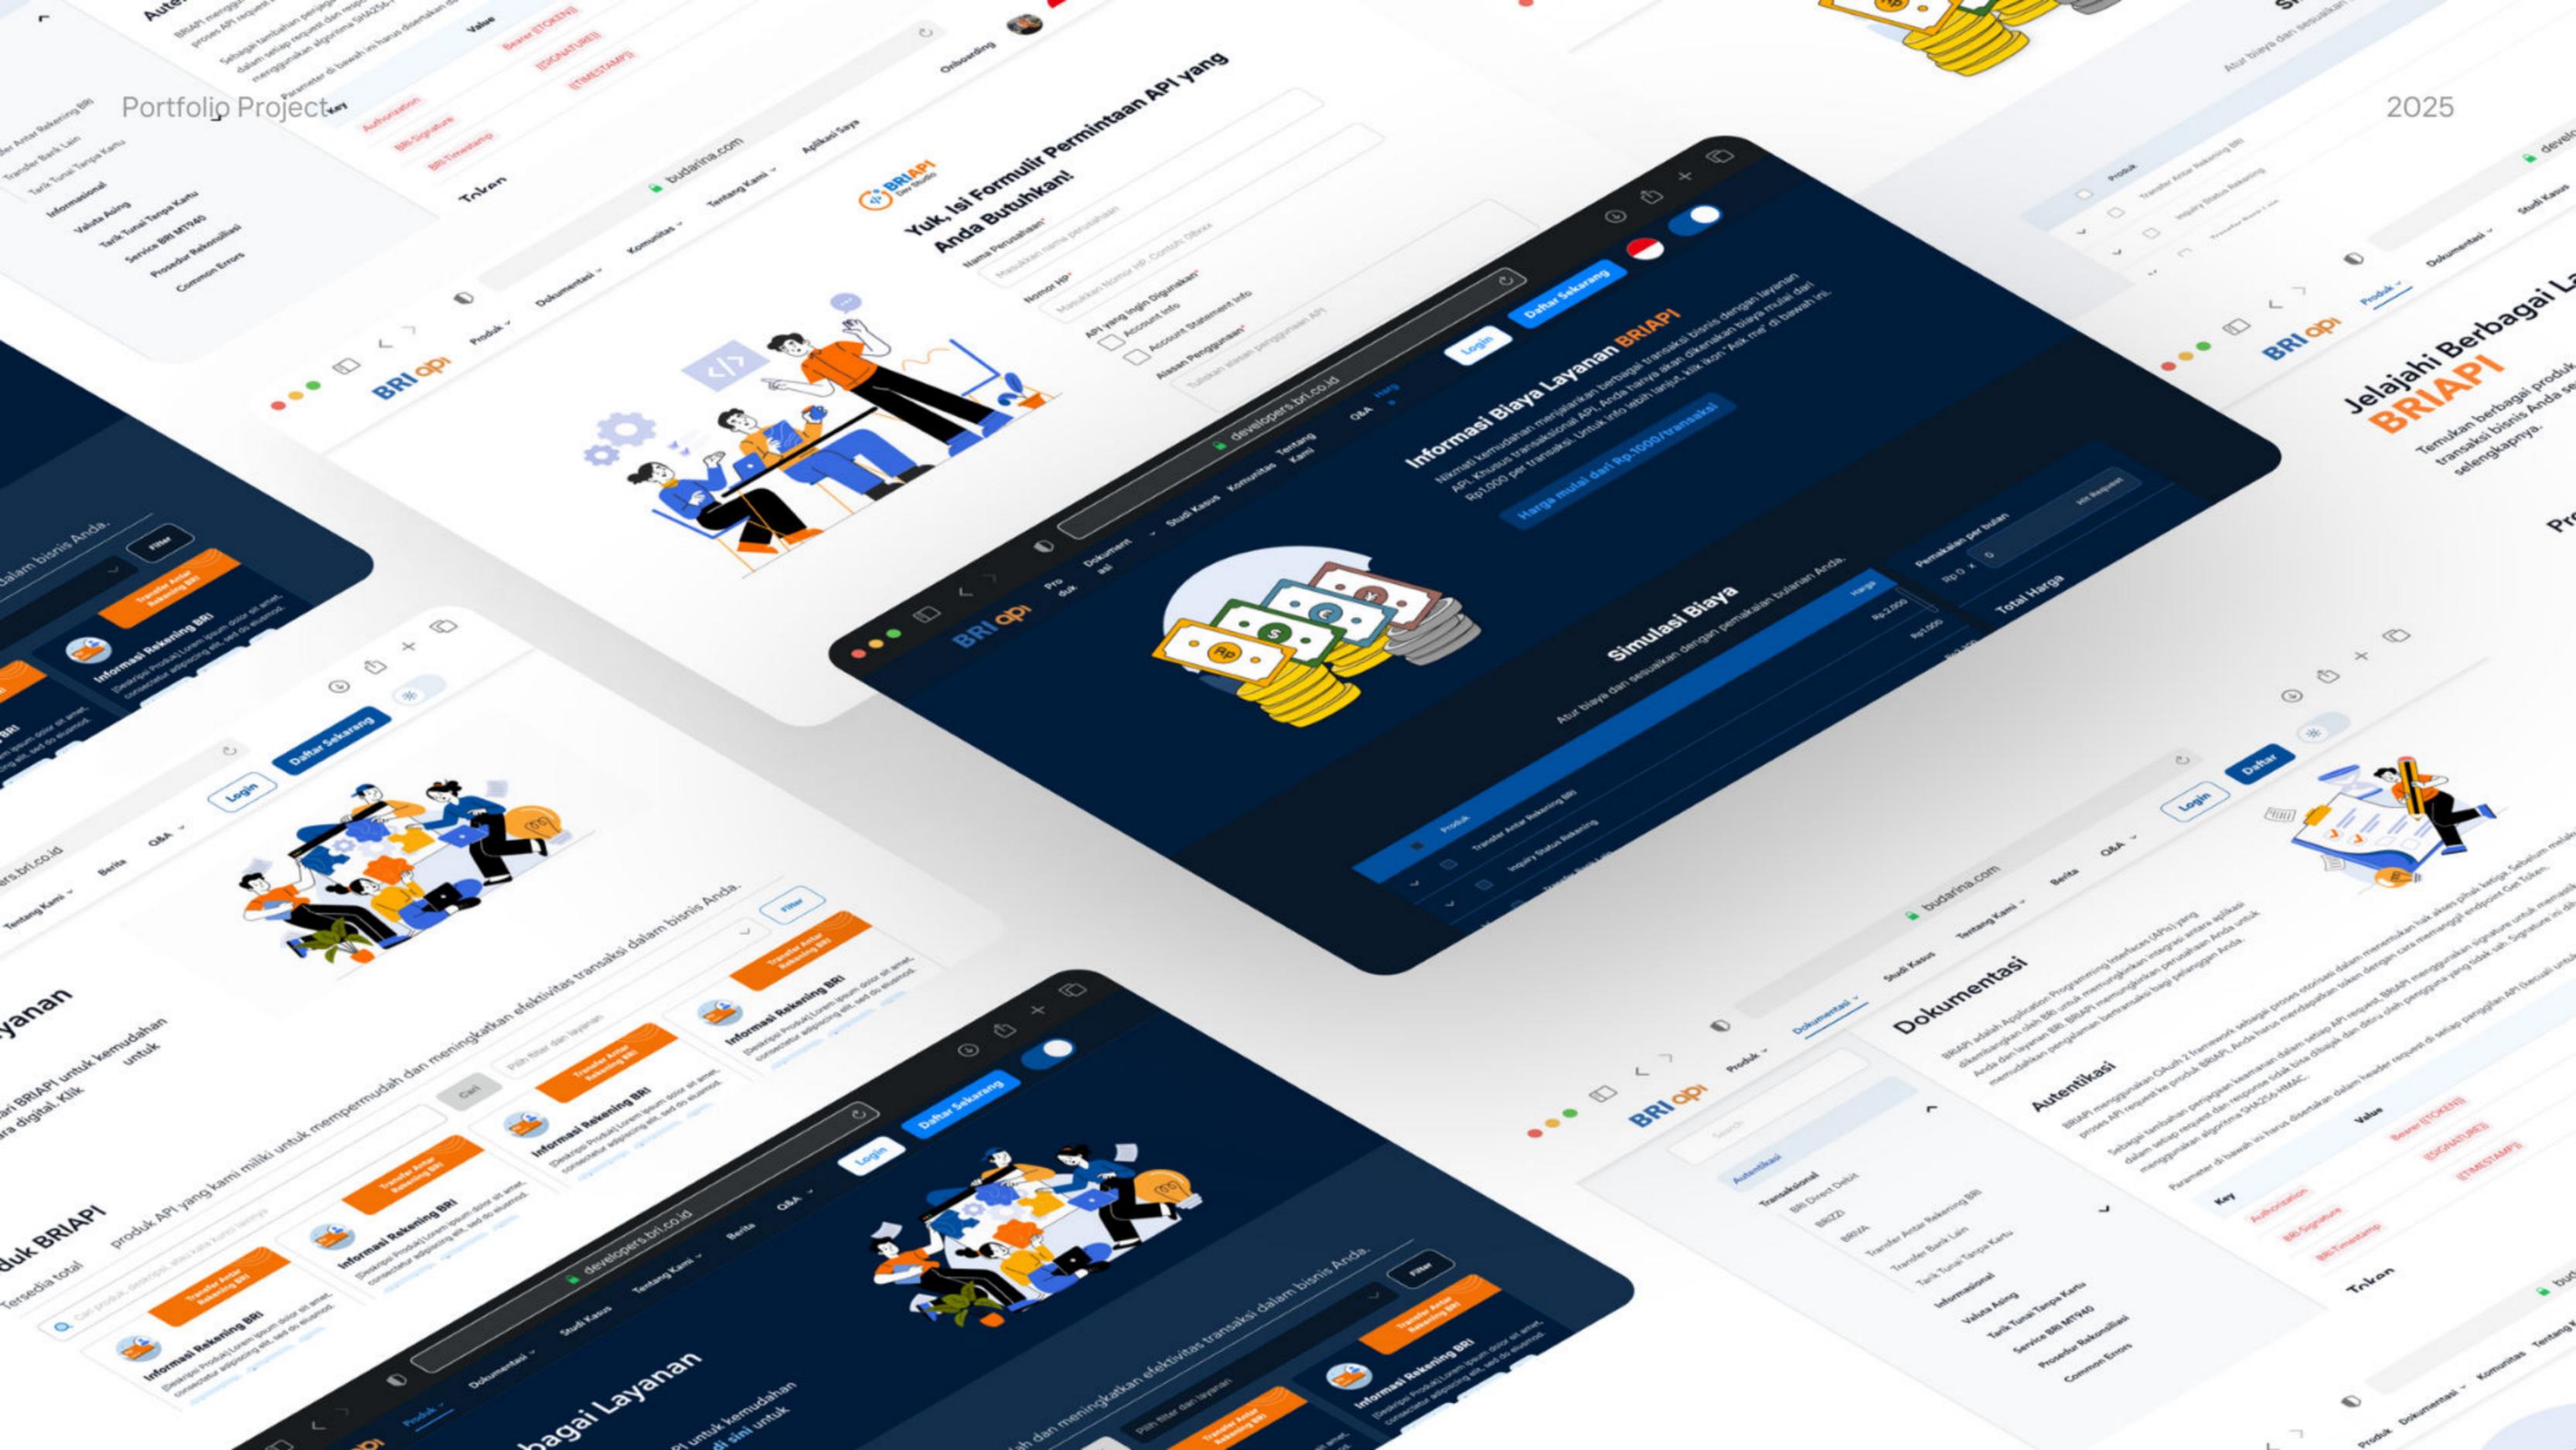

BRIAPI is an Application Programming Interfaces (APIs) developed by BRI that enables customer's application to be able to integrate with BRI banking services easily and quickly.

My responsibility was to make an experience where user can estimate and simulate the pricing of the services they want to implement.

[See this improvement I made on the pricing page →](#)

Informasi Biaya Layanan BRI API

Ikuti kami kemudahan menyediakan berbagai transaksi bisnis dengan layanan API. Khusus transaksi API, Anda hanya akan dikenakan biaya mulai dari Rp1.500 per transaksi. Untuk info lebih lanjut, klik ikon 'Ask me' di bawah ini.

Harga mulai dari Rp.1000/transaksi

Simulasi Biaya

Atur biaya dan simulasi dengan pemakaian bulanan Anda.

Produk	Harga
Transaksi	Rp.1250
Transaksi	Rp.1250
Transaksi	Rp.1250

Pemakaian per bulan: Rp 0

Total Harga: Rp 1.250

Dokumentasi

Autentikasi

BRI API adalah Application Programming Interface (API) yang dikembangkan oleh BRI untuk memungkinkan integrasi antara aplikasi Anda dan layanan BRI. BRI API memungkinkan Pemakaian Anda untuk memulihkan pengalaman bermakna bagi pelanggan Anda.

BRI API menggunakan OAuth 2.0 framework sebagai proses standar dalam memberikan akses pihak ketiga. Sebelum melakukan proses API request ke produk BRI API, Anda harus mendapatkan token dengan cara memanggil endpoint Get Token.

Sebagai tambahan pengaman keamanan dalam setiap API request, BRI API menggunakan signature untuk memverifikasi dalam setiap request dan response tidak bisa dihapus dan ditiru oleh pengguna yang tidak sah. Signature ini dibuat menggunakan algoritma HMAC-SHA256.

Parameter di bawah ini harus disertakan dalam header request di setiap panggilan API (bawahi) untuk

Key	Value
Authorization	Bearer {TOKEN}
BRI-Signature	{SIGNATURE}
BRI-Timestamp	{TIMESTAMP}

Produk Dokumentasi Komunitas Tentang

BRILink Mobile

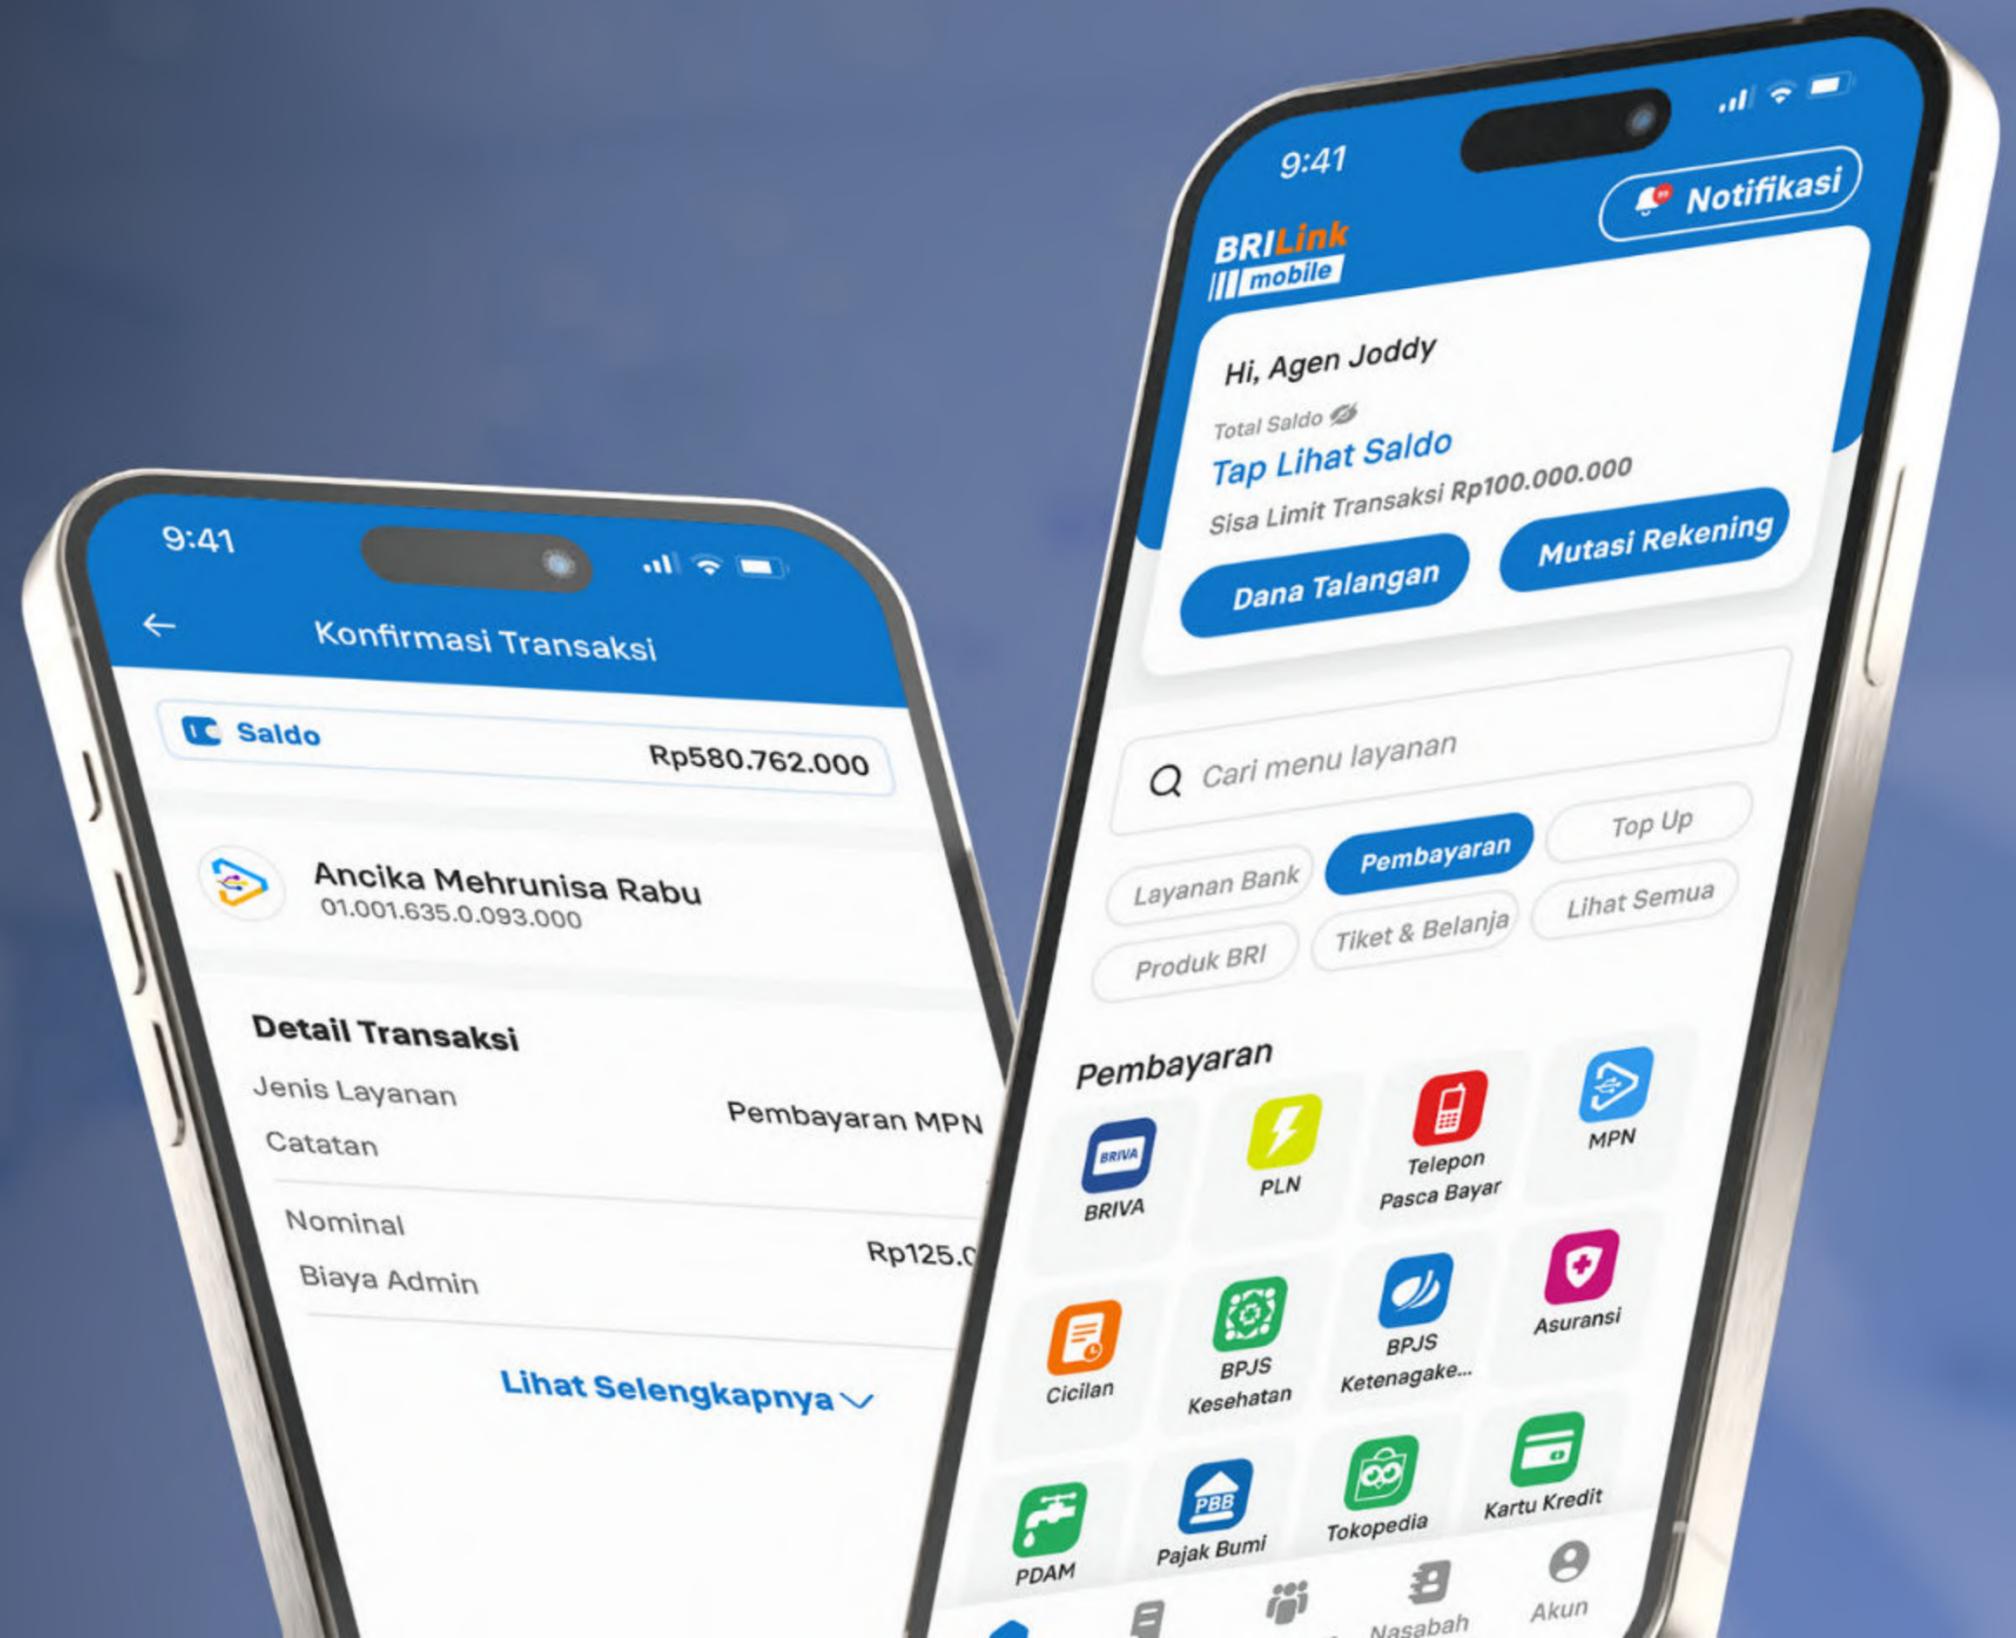

App

Product Design

BRILink is an extension of BRI's services, where BRI collaborates with its customers as Agents who can facilitate real-time online banking transactions for the community through a fee-sharing concept.

BRILink Mobile simplifies access to these services by allowing users to utilize them via smartphones.

I contributed to update the design of various transaction menus, such as payments for PBB and MPN, to achieve greater cohesion within BRI's design system, known as BRIDEX.
